# High navigability and resistance in extreme situations

ihTDeeper® is a one-lumen rapid exchange catheter designed to offer an extension to the guiding catheter.

ihTDeeper® allows a 15 cm extension to the guiding catheter, providing extra support and making interventions easier.

## CATHETER COMPONENTS

Length	155 cm
Workable length	25 cm
Proximal marks	89 and 99 cm
ID	1.4 mm
OD	1.7 mm
GC compatible	6F

- Radiopaque mark at the transition zone to prevent risks when crossing any device through ihTDeeper®.
- ihTDeeper® has an excellent navigability thanks to the different hardness on the device construction.

## SIZE
